

Ecoflexx® 360: Five Seconds to the Truth

## Because both performance metrics and ESG impacts matter

**A single, unified, and central platform combining economic and ecological business and product data: performance metrics, ESG sustainability management, and smart, AI-powered analytics. Companies monitor and optimize themselves using clearly defined KPIs – dynamic, integrated, and audit-ready. Whether throughput rate, quality data, safety, credit rating, liquidity, footprints, emissions, or compliance: Ecoflexx 360 delivers structure, comparability, and efficiency.**

### What is in for you?

- ✓ **Data-driven decisions:** Ecoflexx 360 provides solid KPI foundations for management, internal teams, investors, banks, and key stakeholders.
- ✓ **Visible processes:** End-to-end tracking along the value chain – from energy and emissions to ESG targets.
- ✓ **Compliance built in:** Reports compliant with EU regulations and ISO standards – automated, up-to-date, audit-proof.
- ✓ **AI on board:** AI-powered analysis, intelligent benchmarks, and forecasts for data-driven sustainability decisions.

### Key industries and stakeholders

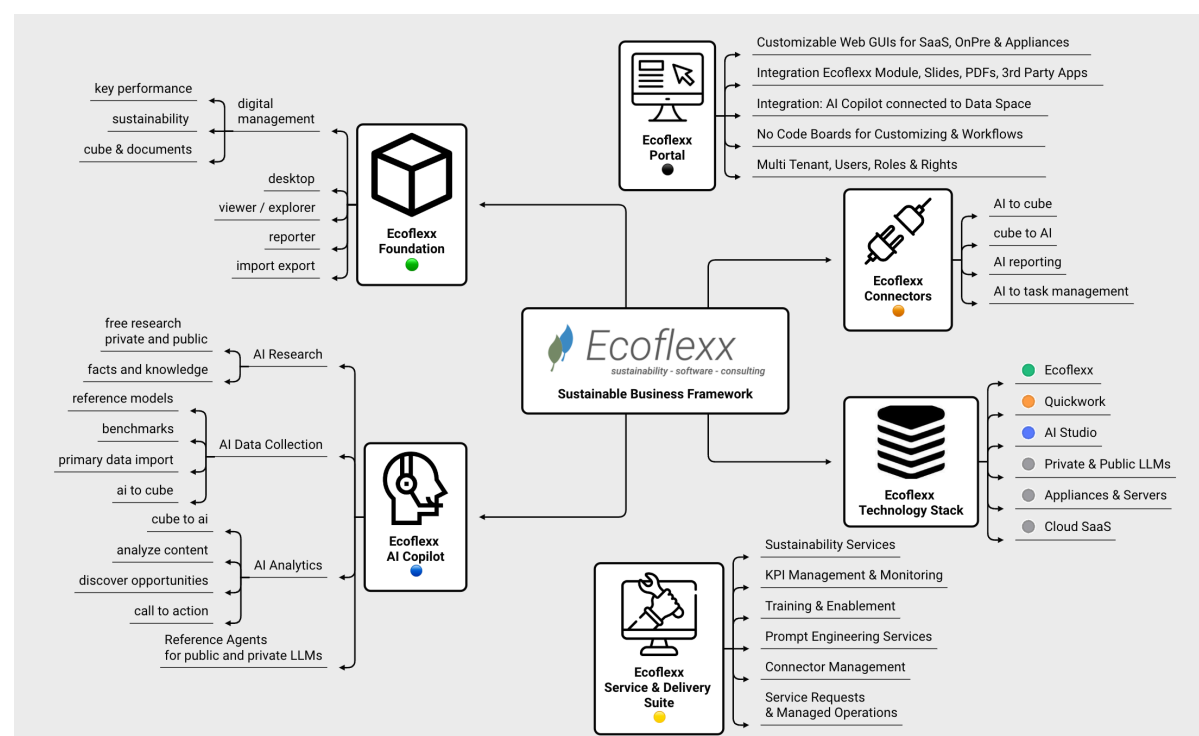

- Steel industry, Metal industry (e.g. aluminum)
- Critical infrastructures, KRITIS
- Chemical industry
- Cement and construction materials, construction industry
- Clean tech sector
- Automotive industry
- General management, sustainability management, finance, production, sales, marketing
- Investors, banks, funding bodies, owners

### Unique Selling Propositions

Ecoflexx 360 combines KPI-based management with ESG standards and intelligent interfaces. Data sources from ERP, industry software, IoT, and third-party providers are integrated automatically. The platform delivers real-time recommendations, reports, and forecasts – enabling operational excellence and strategic ESG management.

The highlight: Ecoflexx 360 merges a precisely calculating KPI database with generative AI in a bidirectional exchange. This enables fact-based assessments in real time – enriched by smart AI recommendations and dynamic scenarios. Strategies become more informed and transparent.

### Ecoflexx® Product Features

- ✓ KPI & Sustainability Controlling
- ✓ ESG-compliant reporting
- ✓ Value chains & supply chains,
- ✓ CO<sub>2</sub> footprints and emissions
- ✓ Scenario analyses & AI recommendations
- ✓ No-code dashboards & KPI designer
- ✓ Certification-ready reports
- ✓ Multi-tenant & role-based system
- ✓ Integration of ERP, IoT & third-party systems
- ✓ Multi-client capable, multilingual & scalable

### Hybrid Sustainability Management

Ecoflexx 360 manages carbon emissions according to GHG ISO 14067 along the lifecycle, integrates external benchmarks, and uses GenAI for analysis, optimization, and reporting.

### Private GPT and Confidential Data Management

Ecoflexx 360 is available as SaaS, on-premise, or appliance. Data is processed securely and confidentially on dedicated hardware or in a protected GDPR-compliant cloud.

### Ecoflexx Service & Delivery Suite

The Ecoflexx Service and Delivery Suite (ESDS) extends Ecoflexx 360 with optional, combinable services – from emissions and KPI data collection to certificate creation, report review, and managed operation service.

All services are modular, bookable step by step, and scale with customer needs – ideal for companies with limited resources or high complexity.
